

# ARCHOS | 14 vision

## A jewel of an MP3 player!

The extra-small form factor of the ARCHOS 14 vision will let you bring it along with you everywhere. It can fit in that tiny little pocket of your jeans.

- Perfect size and weight to be used while jogging, going to the gym, etc
- Store up to 2,000 songs<sup>1</sup> (4 GB<sup>2</sup> memory)
- Play MP3, WMA, WAV, FLAC and APE music files<sup>3</sup>
- FM Radio function with presets
- Store and view thousands of JPEG or BMP photos<sup>4</sup>
- Play videos in MPEG-4 AVI format<sup>3</sup>
- Record voice memos thanks to the built-in microphone
- View song lyrics on the screen<sup>5</sup>

## A unique design in the form of a gem

With the ARCHOS 14 vision, you'll have a mini-sized MP3/MP4 player that you can always carry around with you. It's especially useful when biking or jogging. It could fit in that little front pocket of your jeans, hung as a necklace, or attached to your keychain. It has the look of a fine gemstone (a little square of 1.8" and 4/10 of an inch thick). The handsome front shows only the 1.44 inch TFT screen with the practical buttons slightly hidden on the sides. Placed just right, it's easy to adjust the volume or lock the player while listening to music.

### Listen to music

The ARCHOS 14 vision weighs less than an ounce but can carry your entire music library. It has a capacity of 4GB (the equivalent of 2,000 songs<sup>1</sup>) to store and play all the popular music formats; MP3, WMA (none protected), WAV, FLAC and APE file formats. You can choose your music by title, artist or album. You can also create your own favorites list to play at any time. When you want to add music to your ARCHOS 14 vision, there's nothing simpler. Just connect it to a computer (PC, Mac or Linux) and copy/paste your favorite songs to the "Music" folder of your ARCHOS.

### Listen to FM radio

If your music library isn't enough for you, then switch your ARCHOS 14 vision to its FM radio. You can set FM presets to access your preferred FM stations more rapidly.

### Watch a little video

If you're a fan of music videos or those hilarious videos sent to you by email, then put them on the ARCHOS and share them with your friends regardless of where you are. The ARCHOS comes with a little conversion program that will allow you to convert those videos to the size of its small screen. Store a few of them or a couple dozen on your ARCHOS 14 vision, your friends and family can enjoy them too.

### View photos

It's always nice to have your photos with you to show anytime. You can put your JPEG or BMP formatted photos on the ARCHOS to show pictures of the kids, friends, or the holidays. The ARCHOS 14 vision will become your tiny little personal photo frame. You can view photos one by one, or play a slide show.

### Record your memos

If you need to remember something and you don't have a piece of paper to note it down on, why not just record your voice? The built-in microphone will record your voice memos or any idea that you can't get down on paper.

### ***Technical specifications***

<b>Item</b>	<b>Specifications</b>
